

[DRAFT] Data Sheet E – Results of Internal Review Committee

Date of Review/Recommendation: October 29, 2010

Water Body Under Evaluation:

Water Body ID #: 1632
Name: Little Loutre Creek
Length of Segment: 10 miles
County (ies): Franklin

Use Attainability Analysis (UAA) Study:

UAA ID #: 1345
Submitter: SES, Inc.
Date(s) Conducted: October 5, 2008
Date Received: November 4, 2008
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
☐ 3-Non-Remedial, Human Caused Condition.
☐ 4-Hydrologic Modifications.
☐ 5-Natural Physical Features.
☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown

Comments: The UAA survey was conducted in October 2008 and no WBCR was observed. Footprints were observed during the survey. A 2005 UAA also cites the presence of a tackle box. No interviews were conducted during the 2008 survey.

Is the evaluated use attainable? ☒ Yes ☐ No

Comments: The stream did meet the maximum depth criterion at 2 of the 3 sites evaluated. Also according to the 2005 UAA there was an interview conducted stating that pools were present downstream and deep enough for swimming and fishing. Because the stream met the maximum depth criterion, the committee recommends that the WBCR use designation be retained. Due to evidence of secondary contact recreation (SCR), the committee recommends that the SCR use be assigned.

Committee Recommendation: ☐ Add Use ☒ Retain Use ☐ Remove Use
☐ Modify Use ☐ Inconclusive
